Payment Card Industry Data Security Standard (PCI-DSS)

Small/Medium/Large merchants and business are required to have an on-site/off-site assessment to achieve PCI DSS compliance. We will remain along your side throughout the process and issue a certificate of compliance. If all standard are meet.

Eaglesidea & Risk Associates is a strategic partnership specializing in Payment Card Industry Data Security Standard (PCI-DSS) solutions. With a wealth of experience and a commitment to excellence, our team of experts has a proven track record of delivering successful PCI-DSS implementations for organizations of all sizes.

ISO/IEC 27001:2013 ISMS Implementation

Information as an asset, is important as capital infrastructure and people. Business' security needs are changing rapidly. Enterprises today need to view their organizational structures and processes holistically and must take an integrated approach to secure their information assets including IT, telecommunications & and others. ISO 27001 is precisely tailored to meet all these information security and cyber security needs of the organization.

Eaglesidea & Risk Associates is a strategic partnership that specializes in providing ISO/IEC 27001:2013 Information Security Management System (ISMS) solutions to organizations. Our team of experts possess a wealth of experience in assisting clients in achieving and maintaining compliance with this critical international standard.

Ⓒ Eaglesidea

Vulnerability Assessment & Penetration Testing (VAPT)

Eaglesidea is a leading provider of comprehensive Vulnerability Assessment and Penetration Testing (VAPT) services. Our aim is to assist organizations in identifying and mitigating potential security threats to their systems, infrastructure, and applications. Our team of highly skilled security experts utilizes a combination of manual testing procedures and advanced automated tools to thoroughly evaluate an organization's security posture.

Our VAPT services encompass:

Network Vulnerability Assessment: Our network vulnerability assessment service offers a comprehensive review of an organization's network security. Our experts use a combination of manual testing methods and automated tools to identify and evaluate potential vulnerabilities, and provide tailored recommendations for mitigation.

Web Application Vulnerability Assessment: Our web application vulnerability assessment service is designed to identify and mitigate potential security threats to an organization's web applications. Our experts use industry-leading techniques to test web applications for vulnerabilities such as cross-site scripting, SQL injection, and cross-site request forgery, among others.

System Vulnerability Assessment: Our system vulnerability assessment service provides a comprehensive evaluation of an organization's system security posture. Our experts use a combination of manual testing procedures and automated tools to identify potential vulnerabilities and provide recommendations for remediation.

To Be Continued

ⓔEaglesidea

Vulnerability Assessment & Penetration Testing (VAPT)

Penetration Testing: Our penetration testing service provides an in-depth evaluation of an organization's security posture by simulating real-world attacks. Our team of experts uses a combination of manual testing procedures and automated tools to identify and evaluate potential vulnerabilities, and provide recommendations for remediation.

At Eaglesidea, we are committed to providing organizations with the highest quality VAPT services. Our team of security experts has extensive experience in the field of security and a deep understanding of the latest threat landscape. By outsourcing our VAPT services, organizations can focus on their core business activities while ensuring the security of their systems, infrastructure, and applications.

Digital Certificates & PKI Solutions

As a sales affiliate with DC's & PKI providers Eaglesidea offers and implements Digital Certificates and PKI (Public Key Infrastructure) based solutions. The offerings include Integration of the certificates into applications ranging from e-mail systems to intranets, VPNs, ERP systems or any other customer applications. Security through PKI solutions to a wide range of business to consumer (B2C) and business to business (B2B) applications over the Internet.

Web Development & Hosting Solutions

Our one constant goal has been to help small businesses to enterprise succeed online. We understand the daily dilemma faced by our customers who wear too many hats. So, no matter which Eaglesidea services our customers choose, we make it easy and affordable for them to reach their online goals regardless of technical skill, experience, or stage in their business lifecycle-

- Domain Name Registration
- Web Hosting
- Web Development
- E-commerce
- Web Site Security

Virtualization Technology Solutions

Eagles Idea is partner of VMware Inc. The technologies of VMware simplify IT complexity and streamline operations, help businesses to become more agile, efficient and profitable. By virtualizing infrastructure, from the data center to the cloud, to mobile devices, it enables IT to deliver services from any device, anytime, anywhere.

With a focus on business continuity using VMware-based virtualization and cloud solutions, as well as an introduction to our diverse VMware portfolio.

VMware is a leading provider of SDDC (Software-Defined Data Center) solutions, offering a comprehensive suite of products and solutions that virtualize and automate data center infrastructure. VMware's SDDC solutions include vSphere, vSAN, NSX, vRealize Suite, and VMware Cloud Foundation, which work together to create a unified and flexible platform for managing all aspects of the data center. These solutions are designed to help organizations improve agility, reduce costs, and simplify management of their data center environments.

Eaglesidea works with VMware to provide cutting-edge SDDC solutions that can help businesses unleash the full potential of their data centers.

Security information and event management (SIEM)

Security Information and Event Management (SIEM) is a crucial component of an organization's cybersecurity posture. SIEM solutions gather, examine, and generate alerts from security-related data generated from various sources, such as firewalls, intrusion detection systems (IDS), and servers. These solutions help organizations detect and respond to potential security incidents in real-time, as well as provide historical data analysis and reporting capabilities.

Eaglesidea and Wazuh Inc have formed a strategic partnership to bring advanced cybersecurity solutions to organizations of all sizes in Bangladesh. Eaglesidea is a technology consulting, integration company specializing in delivering tailored solutions for businesses, while Wazuh Inc is the provider of the leading open-source security information and event management (SIEM) software, Wazuh.

The Wazuh SIEM solution offered by the partnership provides organizations with real-time visibility into their IT environment, enabling them to detect and respond to security threats quickly and effectively. The solution integrates with a variety of security technologies and supports compliance with industry standards and regulations, such as PCI DSS, HIPAA, and ISO 27001.

Managed SOC/NOC Solutions

Managed SOC (Security Operations Center) and NOC (Network Operations Center) solutions are outsourcing services that provide organizations with expert monitoring and management of their security and network infrastructure. These solutions are designed to help organizations stay ahead of evolving security threats and network issues, and to improve the efficiency and effectiveness of their security and network operations.

A Managed SOC solution typically includes the following services:

24/7 security monitoring: A team of security experts monitor the organization's IT environment in real-time, using the latest tools and techniques to detect and respond to security threats.

Threat detection and analysis: The Managed SOC team provides in-depth analysis of security threats and recommends appropriate responses.

Incident response: In the event of a security breach, the Managed SOC team provides rapid response and remediation services.

Compliance support: The Managed SOC team provides assistance with meeting various security and regulatory compliance requirements, such as PCI DSS, HIPAA, and ISO 27001.

A Managed NOC solution typically includes the following services:

24/7 network monitoring: A team of network experts monitor the organization's network infrastructure in real-time, using the latest tools and techniques to detect and respond to network issues.

Managed SOC/NOC Solutions

Proactive issue resolution: The Managed NOC team proactively identifies and resolves network issues before they become major problems.

Incident response: In the event of a network issue, the Managed NOC team provides rapid response and resolution services.

Capacity planning: The Managed NOC team provides support with capacity planning, ensuring that the network infrastructure is optimized for performance and scalability.

EaglesIdea has developed own branded **EITIx, Cyber Threat Intelligence Services** which has the advance capabilities to hunting the thread and 365 views of IT asset security Status.

Our **EITIx** is work with Wazuh . Wazuh is an enterprise-ready platform used for security monitoring. It is a free and open-source platform SIEM that is used for threat detection, incident response.
